Comparing Sons-in-Law.

During the Vienna Exhibition an amiable Hungarian merchant happened to meet in a railway carriage a gentleman, with whom he proceeded to hold a pleasant conversation.

"I'm going to Vienna," said the merchant, "to see my daughter, who is well married there. My son-in-law deals in paper and fancy leather work, and has a good trade. He is very prosperous."

"I, also," said the good-natured stranger, "am going to see my daughter and son-in-law."

"Ah! Is your son-in-law well off?" asked the merchant.

"Pretty well; but as he has to carry on his work all alone, it is rather tiresome."

"Is your daughter rich?"

"Not as rich as she'd like to be."

"She likes to spend a good deal on her toilet?"

"No; but she would like to be able to give a great deal in charity."

"She's a good woman," said the merchant, heartily; "it's to be hoped that your son-in-law's business will improve. Good-by, sir. Come to see us, and bring your daughter; we shall be happy to make her acquaintance."

The train arrived at the station at that moment, and the traveller whose son-in-law's business was only "pretty good" was immediately surrounded by grand personages in uniform. After having politely saluted the amazed merchant, he stepped into the carriage of the Emperor of Austria.

The good father-in-law of the dealer in paper and fancy leather goods had been travelling with the Prince Max, of Bavaria, father of the Empress Elizabeth.

A Railway in the Tree Tops.

It may not be known outside the neighborhood where it is situated, but it is nevertheless a fact, that in Sonoma county, Cal., we have an original and successful piece of railroad engineering and building that is not to be found in the books. In the upper part of this county, near the coast, may be seen an actual roadbed in the tree tops. Between the Clipper mills and Stuart's Point, where the road crosses a deep ravine, the trees are sawed off on a level and the timber and ties laid on the stumps. In the centre of the ravine mentioned, two huge redwood trees, standing side by side, form a substantial support, and they are cut off seventy five feet above the ground, and cars loaded with heavy saw logs pass over them with as much security as if it was framed in the most scientific manner. "All roads lead to Rome," except this one. The builders never contemplated a terminus at San Francisco, Petaluma or Chicago, but merely to convey heavy timber from the woods to the mills. There are many places in our redwood forests where this example might be followed profitably, as it would be cheaper to grade through with a cross-cut saw and lay the ties on the stumps than to remove the trees. We can boast of a broad-gauge, a narrow-gauge, and a road in the tree tops—yet we are not all happy.—Herald.
